## Overview:

### **PROS:**

- High RoF
- Reloads Quickly (*fastest of all Pistols*)
- Large Magazine

### **CONS:**

- Low Damage Per Shot
- Short Effectuated Range
- Inaccurate

### **TACTICS:**

This weapon fires relatively low-power rounds at an extremely fast rate which, when paired with a large magazine and an extremely fast reload, ensures a near-constant hail of fire, making extended mags and reload gears unnecessary. However, its accuracy is somewhat low and its range is very short, putting its wielder at greater risk. Giving it to a survivor with a high Ranged Combat skill is recommended.

### **Recommended gear:**

- Ammunition Mods to increase damage per shot, allowing the weapon to kill with less shots.
- Shooting Vests or Shooting Gloves to buff its low accuracy and damage.
- Glasses to increase its short range, with most variants increasing accuracy as well.

### **BACKGROUND:**

A very cheap and compact machine pistol, its mindblowing rate of fire and incredibly effective suppressor design made it the weapon of choice for many criminals, staining the gun's reputation in popular culture. That very same blistering rate of fire does make it hard to control in full-auto.

A common, inexpensive firearm usually seen in the hands of criminals.
