

Schematics

Schematics are a type of crafting item in the Dead Zone Revive.

Any item that the player wishes to craft at their crafting bench requires a schematic, which details the item's cost and crafting requirements.

Basic schematics are automatically unlocked with the Weapon and Crafting Benches reaching the appropriate level. More advanced schematics can be looted while searching the Dead Zone, and will be placed in the inventory to be unlocked. Unlocking a schematic places it as a recipe in the crafting menu, thus allowing for crafting of the item. Duplicate schematics have no further use however, and can be traded off or deleted to save space.
