

HERC-PDW (?)

[HERC

DATABASE ENTRY: HERC-PDW]

Damage	Attacks Per Second	Fire Mode	Knockback	Accuracy	Range	Reload Speed	Magazine Size	Noise
18 - 22 (65.5 DPS)	8.96	Automatic	5%	65%	10	2.6 seconds	30	10

How to Obtain:

- Level 20 Normal variants might be obtained by opening Level 23 HERC Tactical Response Supply Boxes.
- Level 20 Normal variants might be obtained by opening Re-Released HERC Tactical Response Supply Boxes.
- Level 20 Normal variants might be obtained by opening certain Re-Re-Released HERC Tactical Response Supply Box variants.

Crafting:

- The weapon can be upgraded up to level 25.

Recycling products:

- [Return Spring](#) x 1
- [Trigger System](#) x 1
- [Machined Parts](#) x 5

Overview:

PROS:

- Accurate (*vs other SMGs*)
- Fully-Automatic

- Large Magazine
- High RoF

CONS:

- Low Damage (*vs equivalent level weapons*)
- Short Effective Range
- Reloads Slowly (*vs other SMGs*)
- Only available through HERC Tactical Response Supply Boxes

TACTICS:

Basically a higher level PDW-M with improvements in every aspect, this is a powerful weapon to wield. Compared to other SMGs, this weapon has higher accuracy and a slightly faster rate of fire. However, it still wields the same weaknesses as other SMGs, namely low damage and a short effective range. Otherwise, this is a rather effective all-around weapon.

Recommended gear:

- Ammunition Mod increases the damage dealt.
- Extended Mags allows it to fire more rounds before having to reload. Some variants will also speed up its reloads.
- Glasses increases its low effective range, with some variants increasing accuracy as well.

BACKGROUND:

The rate of infected population has increased drastically since the original PDW-M platform was issued to HERC operatives for use in contested areas. Reports on the field have expressed a desire to alleviate the weapon's shortcomings, resulting in a design that is specially configured to fire high-velocity bottleneck cartridges; improving its capability as a CQB weapon for the organization's interests in contested zones.

Due to its high price and confidential construction, distribution of this variant is limited only to those with security clearance.

Variations:

The HERC-PDW has no modular variations.
